

InfraFOF

Infrastructure Fund of Funds

The re-development of an idle industrial site (former AGNO factory), with the aim of creating a modern logistics center, a production unit and a canteen, was carried out with the contribution of the financing of the Infrastructure Fund (TAMYPOD) of the Operational Program Competitiveness, Entrepreneurship and Innovation (EPAnEK). Specifically, the project, with a total budget of 23.3 million euros, was financed by 65% from the Infrastructure Fund, leveraging the remaining 35% with own and bank funds. The resources of the Infrastructure Fund, which contributed to the implementation of the project, come from the European Structural and Investment Funds (ESIF) within the framework of EPAnEK (200 million euros) and from the Greek State (Public Investments Program -200 million euros).
